

Niger Delta Weekly Conflict Update

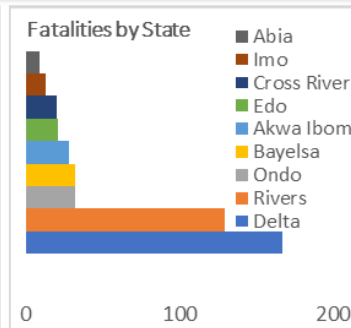

Mitigating Domestic, Environmental, and Industrial Hazards in the Niger Delta

March 22-28, 2026

This update highlights spiraling disaster risks in the Niger Delta, with a focus on domestic, environmental, and industrial hazards. Recent incidents reveal gaps in safety standards and growing threats to vulnerable households and communities, underscoring the urgent need to strengthen prevention, preparedness, and response mechanisms.

Trends and Dynamics of Hazards in the Niger Delta

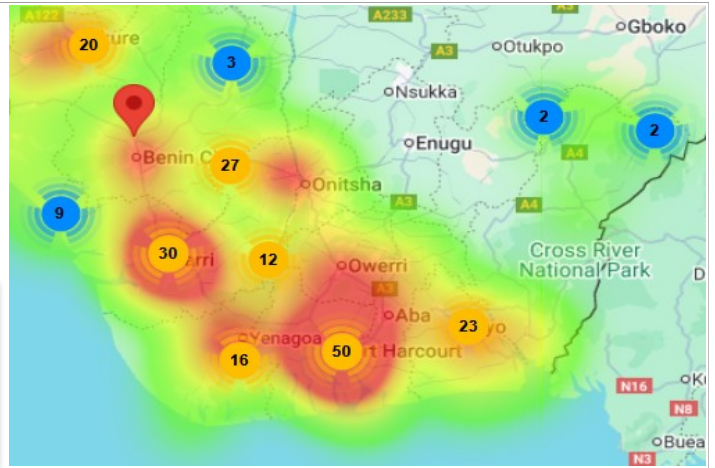

Anticipated Trends and Dynamics

Disaster risks in the Niger Delta are likely to remain high due to unsafe practices, weak safety enforcement, and limited emergency preparedness. Without targeted mitigation, hazards may increase, further straining vulnerable communities, and response systems.

Actions Taken to Mitigate the Situation

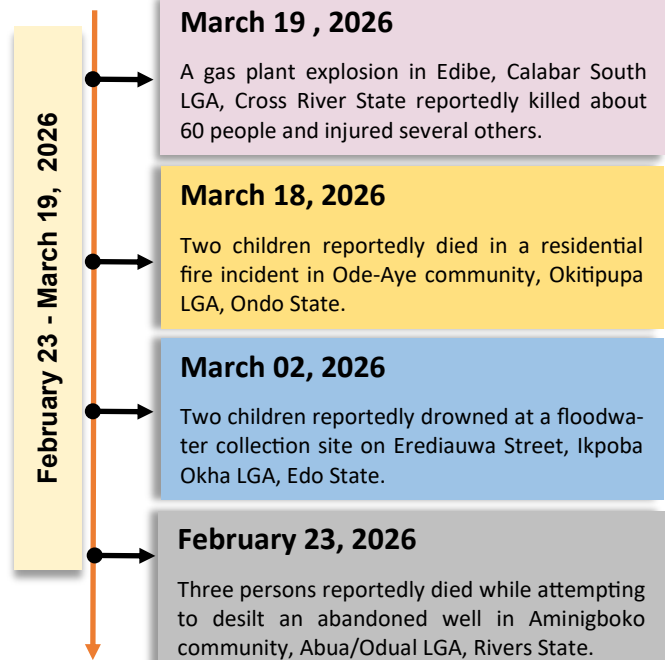

Stakeholders are intensifying emergency response coordination and safety awareness to address domestic, environmental, and industrial hazards. However, sustained enforcement of safety regulations and community sensitization remain essential to preventing future risks.

Heat Map shows the concentration of reported hazard incidents across the Niger Delta from January 2022 - December 2025. Sources: All data sources formatted on PIND's P4P Peace Map www.p4pnigerdelta.org

Timeline of Recent Hazards in the Niger Delta
